Year: 2026

Make: Doolittle

Model: MD721210KDC

Color: Black

Width: 72" **Length:** 12'

GVWR: 10K

ADDITIONAL DETAILS: Height: 24", Weight: 3,142, Axles: 2, Pull Type: Bumper, Construction: Steel

72"x12' Doolittle MD721210KDC Dump

The Doolittle MD721210KDC is a professional-grade "Master Dump" trailer that packs a lot of power into a compact 72" x 12' frame. With a 10,000 lb. GVWR and tandem 5,200 lb. Dexter axles, it's a perfect match for landscaping and construction crews who need to haul heavy materials like gravel or mulch but still want the flexibility to load equipment. It features a heavy-duty dual-cylinder lift system (or an optional scissor hoist) powered by a 3-way KTI pump, allowing you to choose between power up, power down, or gravity down to save your battery. The 20.5" solid steel sides are built tough with a 12-gauge steel floor and 16" on-center crossmembers, ensuring the bed won't oil-can or buckle under heavy use.

What really makes this model a favorite is the "everything-included" approach Doolittle takes. It comes standard with a versatile 3-way spreader gate?meaning you can barn-door it for trash, spread gravel, or fold it down?and includes 5' self-storing ramps and internal D-rings for hauling a skid steer or tractor once the bed is empty. You also get a lockable toolbox that houses the battery and a 5-amp trickle charger, plus a wireless remote for easy operation from the cab of your truck. Between the lifetime LED lighting and the durable two-part epoxy and polyurethane finish, this trailer is designed to handle the daily grind without looking beat up after a few seasons.
