Year: 2026

Make: Doolittle

Model: GT822010K

Color: Black

Width: 82" **Length:** 20'

GVWR: 10K

ADDITIONAL DETAILS: Weight: 2,700, Axles: 2, Pull Type: Bumper, Construction: Steel

82"x20' Doolittle GT822010K Tilt

The Doolittle GT822010K is the go-to choice for anyone tired of messing around with heavy ramps. As part of the Gravity Tilt series, this 82" wide by 20' long trailer (usually featuring a 4' stationary deck and a 16' tilting section) uses a hydraulic dampening system to provide a smooth, controlled tilt for easy loading. With a 10,000 lb. GVWR and tandem 5,200 lb. axles, it's perfectly balanced for hauling medium-sized equipment like skid steers, compact tractors, or even lower-profile vehicles that struggle with traditional ramp angles.

What makes the GT series stand out is the "pro-grade" build quality. You're getting a heavy-duty 6" channel frame and a wrap-around tongue that can handle the stress of daily use. It's loaded with smart features like a locking tilt lever, a removable zinc-plated cylinder pin, and heavy-duty Jeep-style fenders with gussets that double as steps. To ensure it holds up in the Minnesota elements, Doolittle finishes it with an acid-etch phosphate wash followed by a high-quality polyurethane paint. Between the lifetime LED lighting and the pressure-treated wood floor, it's a trailer designed to spend more time working on the job site and less time in the shop.
