Width: 102" **Length:** 20'

GVWR: 14K

ADDITIONAL DETAILS: Weight: 3,420, Axles: 2, Pull Type: Bumper, Construction: Steel

102"x20' Lamar H6022027 Equipment

The Lamar Trailer model H6022027 is a heavy-duty equipment hauler built for towing substantial loads with reliability and ease. This bumper-pull trailer measures 102' wide by 20' long and is typically rated at a 14,000 lb GVWR, giving it a strong payload capacity for construction equipment, tractors, vehicles, and other large machinery. It rides on tandem 7,000 lb EZ-Lube axles with electric brakes and comes with robust features like a 6' channel steel frame with 16'-on-center crossmembers, treated yellow pine deck, driveover fenders, and rub rail with stake pockets for secure tie-downs. Standard towing components include a 2 5/16' adjustable coupler, single 10,000 lb drop-leg jack, and LED lighting with a weather resistant harness, while loading is made easier with slide-in ramps—all finished in Lamar's durable power-coat for corrosion resistance, making it a dependable choice for heavy hauling tasks.
