Color: LAMAR GRAY

Width: 102" **Length:** 32'

GVWR: 14K

ADDITIONAL DETAILS: Weight: 5,490, Axles: 2, Pull Type: Gooseneck, Construction: Steel

102"x32' Lamar H8023227 Equipment

The Lamar H8023227 is a heavy-duty 102" x 32' gooseneck equipment hauler designed to bridge the gap between standard utility trailers and full-sized hotshots. Built on a rugged 8" structural channel frame, this H8 model is specifically engineered to handle the 32-foot span without the sagging or "trailer bounce" often seen in lighter builds. It features a 14,000 lb GVWR supported by dual 7k EZ-Lube spring axles and electric brakes, providing a reliable payload capacity of approximately 8,500 lbs. To make loading easier, it comes standard with a 4' dovetail and a pair of heavy-duty slide-in ramps, while the diamond plate drive-over fenders allow you to utilize the full 102" deck width for wide-track equipment like skid steers or dually trucks.

Attention to detail is where this trailer really stands out for daily operators. It's finished with a high-quality gray powder coat over a sandblasted surface for maximum durability against road debris and weather. The neck features a 30k adjustable coupler and dual 10k drop-leg jacks for a stable foundation when uncoupled. You'll also find practical additions like a front locking toolbox integrated between the gooseneck risers, a winch plate, and an "Arctic" cold-weather wiring harness that stays flexible down to -65°F. Whether you're hauling long loads of hay or moving heavy machinery, this Lamar is built to be a dependable, long-term workhorse.
