### 83"x14' Lamar DT831427 Dump

If you're serious about getting the job done right, you need a trailer that's as tough as you are. The Lamar DT831427 isn't just another dump trailer?it's a beast built to work. This thing is a game-changer, with a huge 14,000-pound GVWR and a payload capacity that'll handle almost anything you can throw at it. Lamar didn't cut any corners here. We're talking about a real, heavy-duty 8-inch I-beam frame, not some flimsy stuff. The floor is a solid 7-gauge steel, and the crossmembers are spaced every 12 inches for unbelievable support. That means you can haul heavy rocks, demo debris, or anything else you've got without a second thought. The telescopic lift gives you a powerful, smooth dump, and the combination spreader/barn door makes it a breeze to unload. Plus, those heavy-duty slide-in ramps are a lifesaver for loading up equipment. This trailer is built to last, and you'll feel the difference the moment you hook it up.
