82"x14' Quality Steel & Aluminum 8214AN3.5KSA Utility

When you need some extra deck length but still want a trailer that's light, agile, and easy to manage, this Quality Steel and Aluminum 82" x 14' utility trailer is an incredibly smart setup. Built with a tough, powder-coated steel frame and a solid tube top rail, the extra two feet of length on this 14-foot deck gives you that crucial breathing room to fit a full-sized side-by-side with gear, or a commercial mower along with extra landscaping tools. It's equipped with a 3,500 lb. axle but smartly derated to a 2,990 lb. GVWR, meaning you get a generous payload capacity of around 1,970 lbs. while staying completely clear of the added weight, maintenance, and registration hurdles of a heavier braked trailer. Complete with a heavy-duty rear mesh ramp gate for effortless loading, smooth radial tires, and bright LED lighting, it's a versatile, long-deck workhorse that hauls beautifully without breaking your back or your truck's fuel economy.
