83"x22' 2" MIDSOTA TILT BED Equipment

If you're tired of wrestling with heavy, awkward ramps every time you need to move equipment, this 2021 Midsota 83" x 22' commercial gravity tilt trailer is the upgrade you've been looking for. Built right here in Minnesota, Midsota is legendary for making some of the toughest, most user-friendly trailers on the road, and this specific configuration is a contractor's dream. It features a 6-foot stationary front deck that is perfect for securing your attachments, toolboxes, or extra gear, paired with a 16-foot tilting bed that provides a smooth, low-profile loading angle. You just unlatch the deck, drive your skid loader, compact tractor, or scissor lift right up, and let gravity safely do the rest?no back strain, no lifting, and no wasted time on the job site. With a robust 12,000-pound GVWR, this trailer offers plenty of muscle for serious payloads while remaining highly versatile and easy to tow. The 83-inch wide bed easily accommodates wide-track machinery, and the premium treated wood decking is built to take a beating from heavy steel tracks and harsh weather. For securing your loads, it comes equipped with heavy-duty stake pockets and a solid rub rail running down the sides, giving you endless options for strapping down gear. Midsota finished this model wrapped up with all-LED lighting and protected, enclosed wiring to save you from constant maintenance headaches. It is bulletproof, and ready to hook up and go straight to work for your business.
